

# PAST PERFORMANCE—EDUCATION

## Long Beach Unified School District

VetComm performed a design-build of a complete Bosch CCTV System for (15) High Schools in Long Beach Unified School District. This was a bonded project that was completed under time estimated, and under budget. Complex Engineering of system performed in-house by VetComm Engineering staff. System consisted of approx. 400 high definition cameras with redundant storage at the camera, and locally at each school. All data was then backed up at the District office for Long Beach Unified School District. System retention was established to provided over 1-year of storage for each school system. VetComm performed all necessary network configuration within the district network, and each school. Redundancy established through complex configuration. All work performed after hours with special coordination with district.

Project Value: \$2,100,000.00

## Chaffey Joint Union High School District

VetComm successfully completed installation of approx.. 350+ IP cameras between (13) Schools. This was a full integration project to move the district to a BVMS system centrally located at the District office. VetComm provided life-time update and software warranty through Bosch on all software licenses. VetComm installed and configured (13) local NVR's, and mapped a backup system to the District through Bosch BVMS 5.0. Worked together with cabling vendor to establish connectivity to all cameras in the system which consisted of a mix of fixed and PTZ IP Cameras with local SD card for redundancy.

Project Value: \$565,000.00

## Escondido Union School District

Design/Build of Bosch CCTV Security System with 150 Cameras between 7 schools in District. Combination of Fixed with various lenses per application and PTZ cameras. Provide 110v power where needed for all cams, PTZ and dedicated 110v outlets for each of the (7) DVR's VetComm Installed. All cable home-run in Rigid or EMT Conduit as needed for each location at every school. Obtain Permits as needed for all electrical work. Approx. 4000' of conduit placed by VetComm. DVR's to support 1-month monitoring. Installation included Video Analytics and event email notifications as part of the service integration. VetComm provided and installed 30' poles for (2) PTZ cameras at two different schools. Privacy Masking and motion detection included in integration. All fixed Cams properly adjusted for Day/Night operation.

Project Value: \$514,000.00
