

PAST PERFORMANCE—GLOBAL

**United States
Navy MWR**

Project Type: Ethernet Extension

Scope of Work: First phase consisted of performing Site Survey's for (6) sites in Japan for Ethernet Extensions. Each site had up to 8 remote buildings for Ethernet distribution from BCO/MPOE (Base Communication Office). Results determined that special equipment to extend Ethernet over existing copper was the best solution as no fiber existed, and customer bandwidth requirements were minimal. Solution resulted in deploying ADC and Blackbox Central Office equipment to extend Ethernet up to 5 miles over copper. Vetcomm installed Rack mounted power distribution, equipment shelves, and Multi-slot chassis units at various sites with various requirements. All Ethernet circuits tested with customer through ping test at each site. Systems/Equipment used: ADC, Blackbox, Cisco, TE/Amp.

Location of Project: Sasebo/Hario/Atsugi/Kadena/White Beach, Japan

Project Role: Subcontractor

Project Value: \$149,000.00

**US Army Reserve
Complex/
USARC G-6**

Project Type: Ethernet Extension / Inside Wiring / SIPR

Scope of Work: Relocated customer CPE to new location from SIPR rack. Rerouted necessary copper and fiber cabling for existing Ethernet Circuit, and patch accordingly. Relocated Cisco Router and provided Smart hands onsite support for last minute configuration changes. Provided surge protection for power requirements and test with Verizon NOC Center. Systems/equipment used: Cisco, Belden, Corning.

Location of Project: Yong San, South Korea

Project Role: Subcontractor

Project Value: \$1,700.00

**US Army Reserve
Complex/
USARC G-6**

Project Type: Ethernet Extension / Electrical

Scope of Work: Relocated customer CPE to new location from Room E138. Extended necessary copper and fiber cabling for new Ethernet Circuit, and patched accordingly. Installed conduit for new dedicate electrical Circuit for Cisco 3925 Router. Installed Router and test with Verizon NOC. Systems/Equipment used: Leviton, GE, Cisco.

Location of Project: Su Det, Japan

Project Role: Subcontractor

Project Value: \$4,100.00

E-RATE

Quality end-to-end, integrated technology solutions, procurement, and implementations since 1997.
